

Please do not allow LPFM stations to take priority over current FM translator service. FM translator service is how K-LOVE radio is delivered to my area. I listen almost exclusively to K-LOVE and believe it is a great benefit to the local community. K-LOVE provides wholesome content with positive values and role models that the entire family can enjoy. They also regularly provide free announcements of events for local non-profit organizations.

I firmly believe that the message that children, teenagers, and to a lesser extent, even adults absorb from the media has a significant impact on their social development and beliefs. There is a glut of radio stations available to provide listeners with non-positive, socially unredemptive content. Please do not make it impossible for those few stations that want to offer a positive alternative to do so.
